

DS100

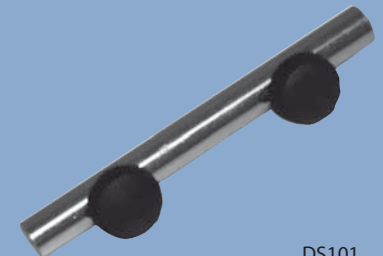

Easy Displays with connectors

Easy to transport and store with a space saving Carrying Case

Plastic hooks for wall mounting

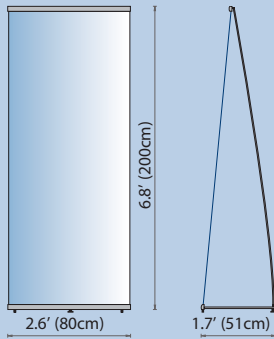

DS101

Two connectors can be used to combine two displays creating a larger advertising space.

Easy Display and Easy Display DS are lightweight and easy to use. You can achieve maximum exposure for your advertising message because of their state-of-the-art designs. The Easy Displays can be assembled by one person in a very short time without any tools. The aluminum clamping strips at the top and bottom allow you to quickly change images which makes this the perfect solution for temporary displays and changing atmospheres. Delivery also includes hooks for wall mounting. Larger images can be created by connecting multiple displays with the connectors. Both Easy Displays, as well as the graphics, can be transported easily in a space saving Carrying Case.

Easy Display
