Graphic Guidelines for Premium Fabric prints

Acceptable File Formats

- Adobe Illustrator
- Adobe Photoshop
- Corel Draw
- Freehand

The files can be sent in MAC or PC Format

Layout

Define pictures in CMYK mode.

Define colors according to RAL or Pantone

Picture images must have a resolution of 300 dpi and scale of 1:10.

We require an additional 10% of picture for finishing.

Do not use closed EPS files

Stroke Strength

To avoid unclear or blurred images please observe a minimum line strength of .04" (1mm) and .08" (2mm) for inverse lines. To intensify the Serif fonts, a contour of the same color can be placed around the characters.

Color

If you provide us with pantone color, we will match defined colors as closely as possible, however the 100% reproduction of defined colors (PANTONE, RAL) is not always possible.

If you are concerned about color matching, we recommend printing a sample at additional cost and production time.

For more questions please do not hesitate to contact us.
