

## RAZOR THIN LED LIGHT BOX

These LED light boxes are so thin, they look like they are part of the wall. LED technology uses 80% less power than fluorescent bulbs, are low voltage and very safe to use. The light radiates from the edges for a bright, even spread of light. Change graphics in a matter of seconds with the snap open frame. UL and CE listed transformer and lights.

- OUR THINNEST LIGHT BOX - JUST 1/2" THICK
- LED USES 80% LESS POWER THAN FLUORESCENT BULBS
- UL LISTED FOR SAFETY
- 2 SIZES TO CHOOSE FROM
