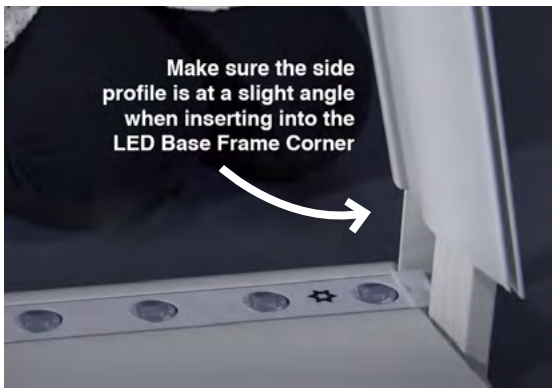
Stock sizes consist of 3', 5', 8' and 10' with a height reaching a full 8 feet. Additional accessories for this design include attachments to connect units together, side clamps to hang literature, slide on feet for a customized base arrangement and much more.

**STEP #1**

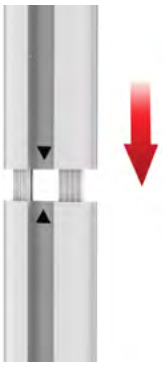
Start connecting bottom parts with matching stickers (star shapes) and then connect to uprights. **NOTE: corner parts can be difficult to insert into grooves. Slightly angle the upright profile to help it connect.**

See video here: https://www.youtube.com/watch?v=d1zfeWIYJto



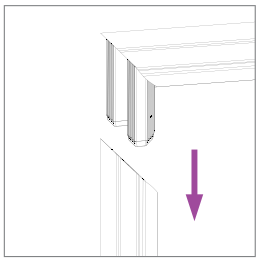
**STEP #2**

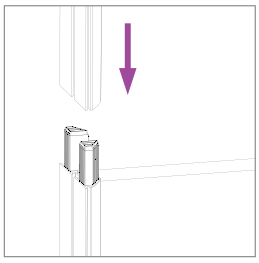
Continue connecting all profiles to install the next pair of side panels by matching the shape and color to the appropriate piece. Be sure to connect the wires inside the panels as well. This will ensure the lighting is completely connected to fulfill the frame.

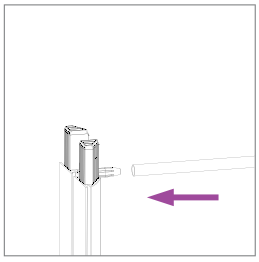


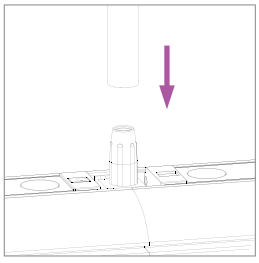
# Full Diagram of 10ft Lightbox Instructions

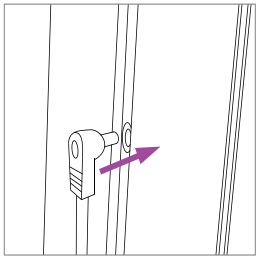
**NOTE**: Remember to match each individual part its corresponding shape sticker.
The unit will ***not power properly*** if out of sequence.

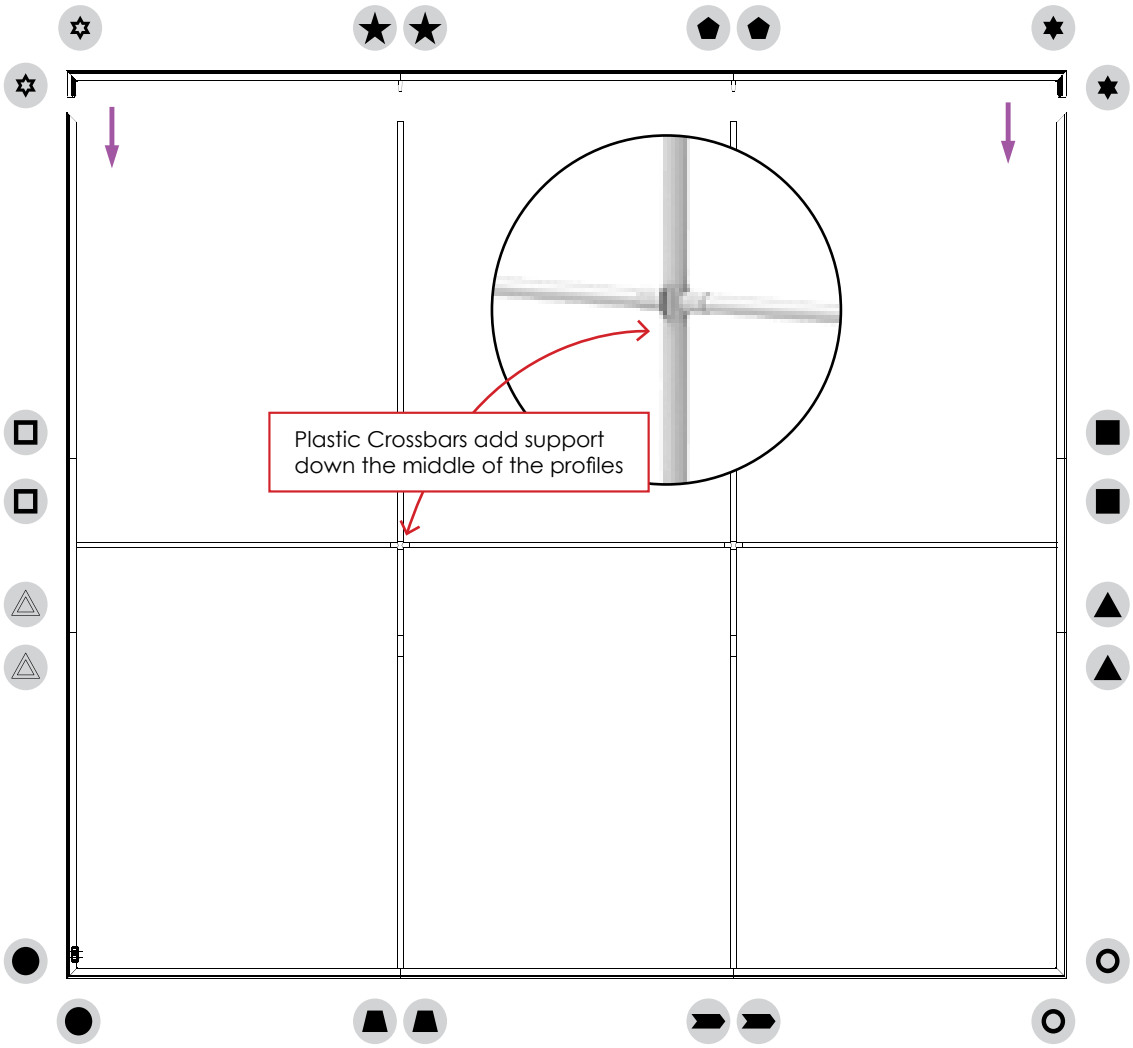


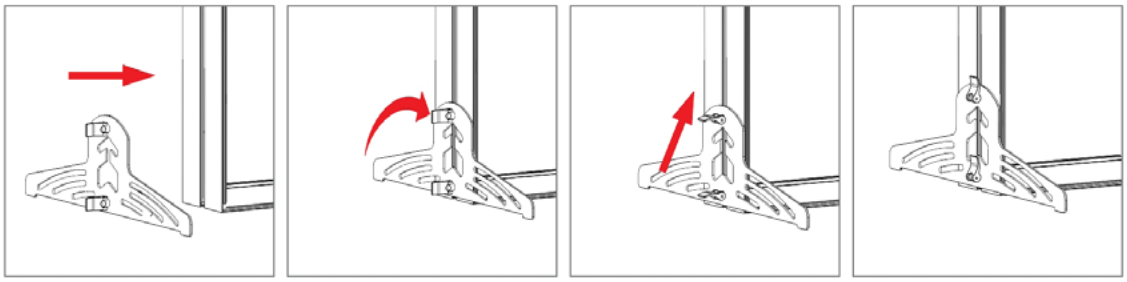






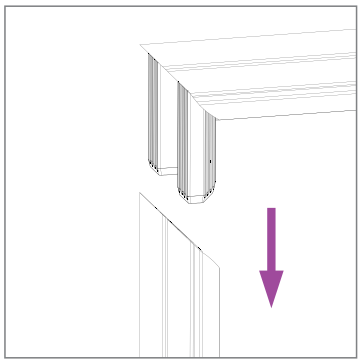


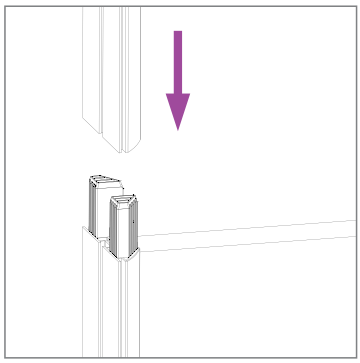


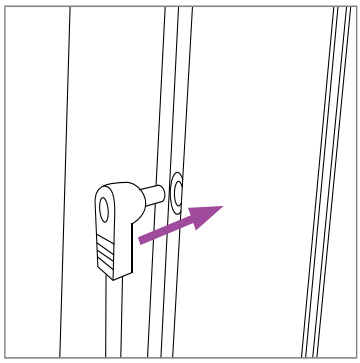


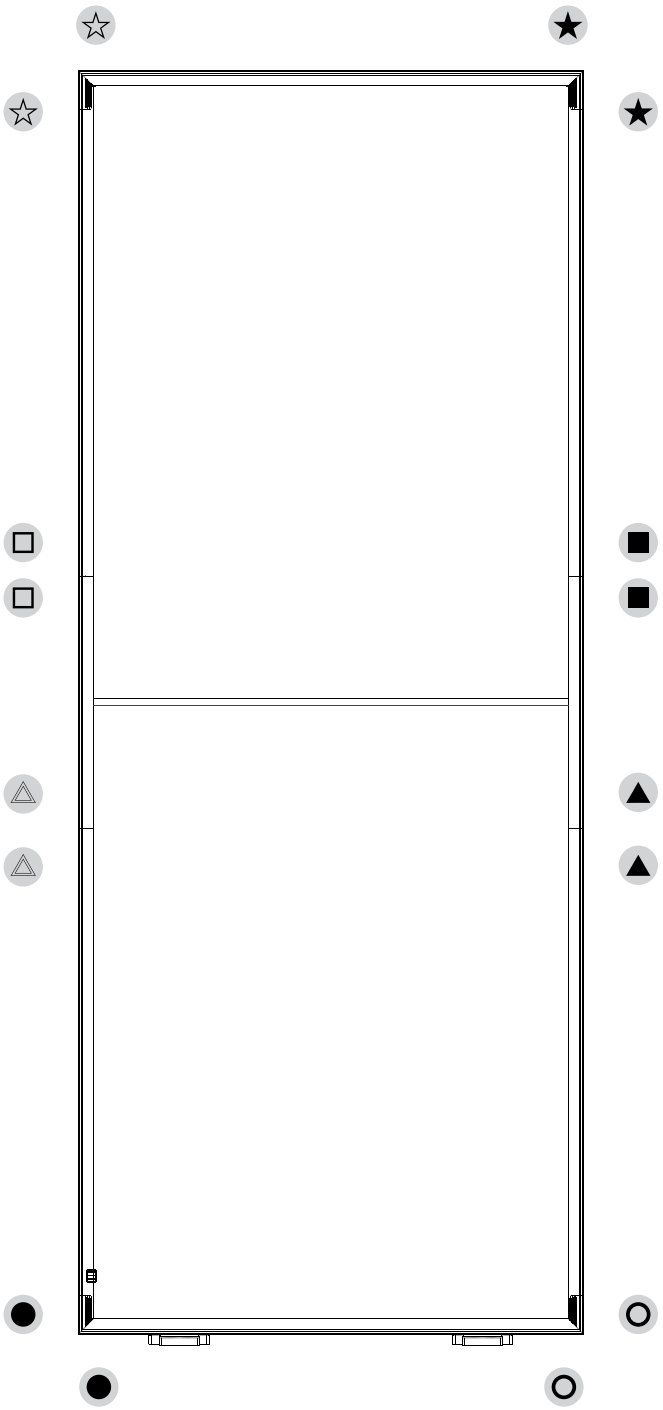
# Full Diagram of 3ft Lightbox Instructions

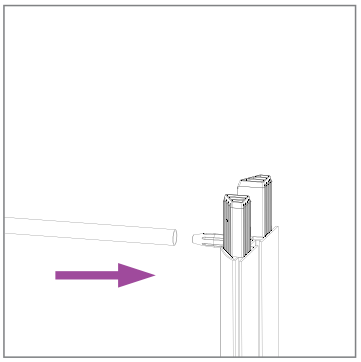
**NOTE**: Remember to match each individual hardware by it's shape.
The unit will not power properly if out of order.

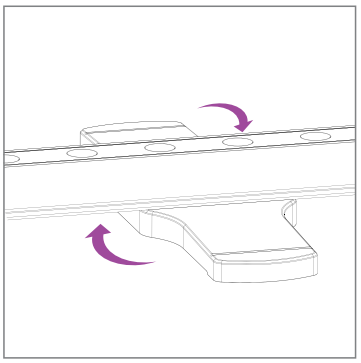






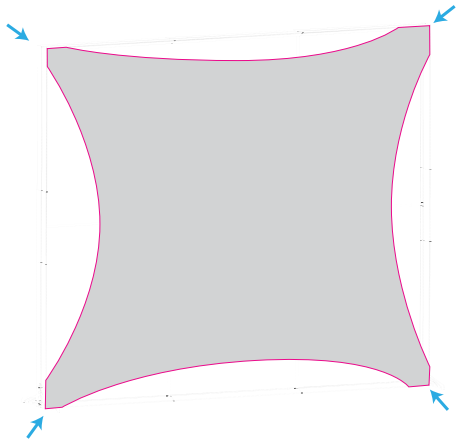




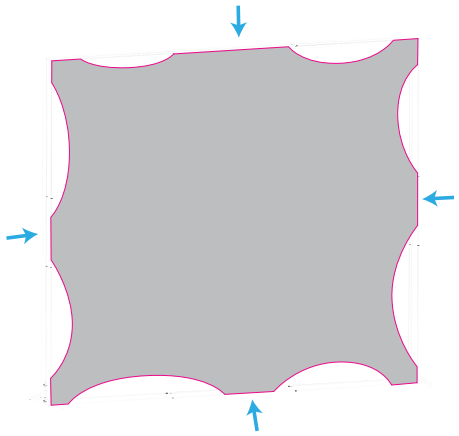


# Diagram of SEG Silicone Edge Graphic Installation

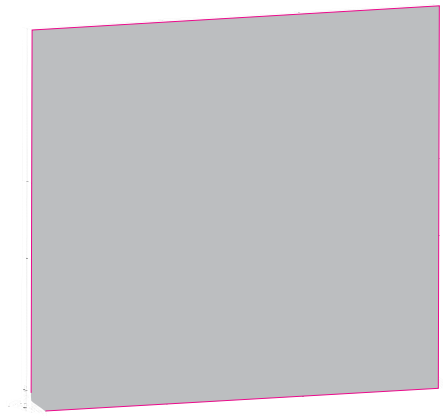
**NOTE**: You must always start at the corners of each frame in order to properly tension the graphic. It should be evently tight like a drum all the way around the frame.



***STEP 2.*** Position the graphic on the frame, make sure the top of the graphic is at the top of the frame. Begin pressing the silicone edge into the frame, start with all 4 corners first.



***STEP 3.*** With the corners of the graphic in place, press the silicone edge in the middle of the frame on all 4 sides.



***STEP 4.*** Finish pressing in all the silicone edge into the frame around the whole frame. Repeat for the other side.
